RECORDING NOTES

- Timestamps assume the standard 3:22 album version.
- If your karaoke/instrumental track has a shorter intro, shift everything by that offset (e.g., if your track skips the 8-sec intro, subtract 0:08 from every cue).
- Pre-Chorus and Tag sections are where the energy LIFTS — match Miley's build-up.
- The "Whoa-oh-oh" parts should hit on the same beat as her chorus hook.
- Bridge (2:30) is the lowest-energy part of the song — Prahaas can drop into a calmer flow for DISHES, then build back up.
